

## **SHARE YOUR CULTURE, SHARE YOUR LIFE, HOST A FRENCH STUDENT WITH ENGLISH'N STUFF!**

There is nothing like a language immersion to experience a new culture while improving your language skills and broadening your horizons. Peggy Labat had the opportunity to study at the University of Tampa, and her experience greatly contributed to the French Exchange Program she launched in 2017. As a teacher of English as a Foreign Language and a mother of three, she wishes to offer young people living in the sister cities of Le Havre, Normandy, France and Tampa and the Tampa Bay area a unique opportunity to meet and share in the American and French lifestyles.

This personalized program is organized during the summertime. A French participant who is between 14 and 17 years old lives with his/her American partner and family on private arrangements for a two to three week period to be defined with his/her parents (in June, July or August). The American family is expected to provide a warm and secure environment and include the French participant in family events. The American student then has the opportunity to travel to France and, in turn, discovers a new country and lifestyle. We are sure that this experience will bring memories and friendship that will last a lifetime, and will impart several benefits: regularly converse with a native speaker, explore the option of visiting Le Havre, Normandy, France, become familiar with the French culture, and show college admissions officers the participant is curious and responsible, taking the initiative to broaden their academic life. A recent Tampa high school exchange student shared her recent experiences and observations in her blog: <https://kmccaffr100.wixsite.com/tampatolehavre>

Our successful track record establishing and maintaining these enduring friendships between families in Le Havre, Normandy and the Tampa Bay area makes us a trusted provider of cultural exchange. We would like to bring this opportunity to more families living in Tampa and the Tampa Bay area and look forward to forming a mutually rewarding network!
